

HOME WEATHERIZATION AND ENERGY EFFICIENCY

Sustainable Resources Center has more than 30 years of weatherization experience, in over 10,000 homes. Many energy and indoor air quality problems can lead to serious health issues, and cause expensive structural damage to your home.

Sustainable Resources Center provides federally funded services for low-income residents.

If you are on Energy Assistance, and live in suburban Hennepin County, you may request a referral for our weatherization services.

For more information, contact the Weatherization Line, at 612-872-3294.

TRAININGS

"Essentials for Healthy Homes Practitioners"

This course is designed for professionals working in the areas of affordable housing, community service delivery, and public health. Visit, **www.healthyhomestraining.org** for course dates and locations.

National Healthy
Homes Training
Center and Network in
partnership with
Sustainable Resources
Center

For more information, contact our general number, at 612-870-4255.

"Lead Safety for Remodeling, Repair and Painting"

Offered in English and in Spanish, this eight hour training is based on HUD and EPA curriculum. This course provides attendees with the necessary knowledge and procedures for controlling lead in their work areas. Attendees who successfully complete the course will be awarded a certificate.

For course dates and registration details visit our website calendar www.src-mn.org or call 612-870-4255.

POISONING PREVENTION: LEAD EDUCATION AND OUTREACH

**Sustainable
Resources
Center, Inc.**

Sustainable Resources Center is a 501(c)3 non-profit. Our mission is to partner with families and communities to create healthy home environments.

We offer families the tools they need to identify in-home environmental toxins. We provide them with the information, skills and resources they need in order to be safe from hazards in their homes.

Sustainable Resources Center's policies are family friendly and involve everyone in the work of creating and sustaining healthy homes.

Lead poisoning is completely preventable. In spite of this, nearly one million children living in the United States have lead levels in their blood high enough to cause irreversible damage. In our efforts to prevent lead poisoning we offer the following services:

- Lead tests for children six and younger and pregnant or nursing mothers
- Audience tailored presentations and puppet shows (hosted at your agency)
- Home and soil lead testing coupled with in-home education (for homes built in or before 1978 with a child six or younger)
- Housing interventions for children with elevated blood lead levels
- HEPA vacuum rental for residential use
- Assistance in applying for Hennepin County Lead-Safe Partnership grants

For more information, contact the Education and Outreach Department's *Lead Line* at, 612-872-3281

POISONING PREVENTION: LEAD HAZARD CONTROL

Sustainable Resources Center assists qualifying families in addressing dangerous lead hazards in the home.

Our work crews have replaced windows in hundreds of homes and apartment buildings

throughout the Twin Cities and Greater Minnesota. Families and property owners who qualify may be eligible for the following services:

- In-depth lead Risk Assessment with full report of lead hazards
- Window rehabilitation or window replacement
- Training on how to do "lead-safe" work

For more information, contact us at, 612-872-3281
